**GROWN IN THE ROSE
GARDEN OF AMERICA**

Proper budding plus a wonderful growing season, which gives our rose bushes the benefit of 18 to 20 months of actual field growth during their first two years, makes Naughton roses vigorously healthy... well able to grow in any climate in the United States. Satisfied customers in every state have found that the sturdy understock and fine root systems of Naughton roses let them "go right on growing" when they are set out.

Our many years of experience in handling roses raised in every part of the United States has convinced us that the Neches River section of East Texas, where part of our roses are grown, can honestly be described as the finest rose-growing area in the country — truly the "Rose Garden of America." The rich, sandy soil, mild climate and long growing season of the Neches River area is ideal for starting all types of nursery stock; our roses are bigger and better at the end of two years than most are at the end of three, giving you fully matured plants which will thrive and bloom the first year in your yard or garden.

The Multiflora Japonica stock upon which Naughton roses are budded is the sturdiest and most vigorous rose stock in the world — which means that you can take your Naughton rose bushes out of the package in which they come to you, set them out in your garden with a minimum of trouble, and HAVE BEAUTIFUL BLOOMING BUSHES THE FIRST YEAR. No flower gives as much pleasure with as little trouble as the rose. Of course roses "do better" when they are properly

cultivated and fed and are kept watered, but even under adverse conditions which would kill many plants they continue to give unstintingly of their beauty and fragrance. The wide variety of types and colors of roses available from Naughton Farms, Inc., offers an opportunity for you to have beautiful flowers to please everyone in the family, no matter what their taste.

FLORIBUNDA ROSES

*Glory of
the Gardens*

Every garden has a spot which needs "filling in" with something lively and long-lasting . . . or a division line which will look better if it is marked by a lovely hedge of roses. For those spots there is nothing finer than the Floribunda Roses — the hardy little beauties which have the grace and delicacy of miniatures, yet bloom profusely and are large enough for cutting. Here are four of the best:

ELSE POULSEN. A lovely clear pink, slightly frilled, and a free bloomer. Makes a beautiful border, background or hedge rose, being full-leaved and often growing as much as 3 feet tall.

GRUSS AN AACHEN. Grows about 18 inches tall; very profuse bloomer, with orange-pink buds which open to beautiful double blooms of hybrid Tea Rose form, becoming a soft delicate salmon color as they open to full size.

LAFAYETTE. There's never a brighter spot in any garden than that where this brilliant cherry-red rose blooms throughout the entire season. It grows from 2½ to 3 feet tall — another marvelous border, background or hedge rose.

KIRSTEN POULSEN. A vigorous grower and a real dandy. Flowers are pink to rose, beautifully open and long-lasting. Blooms all season and makes a lovely addition to any garden or bed.

You won't make a mistake when you set out any or all of these free-growing, free-blooming Floribundas.

Climbing Roses

YOU can train these fine roses to do anything you want them to do—they are the same type bushes you have seen and admired in other people's gardens, climbing along fences, on trellises and over garages. Wonderful for "dressing up" blank walls, bare fence corners and such unsightly spots, or simply for making a beautiful and picturesque wall of bloom around your garden or entire yard. They are hardy anywhere, and grow rapidly with little or no attention.
